

## FOX AND GEES

How much harm can one small fox do? After all there are fifteen geese!

The fox starts on the red circle, and the geese flock together on the green circles.  
Toss a coin to see who goes first.

On their turn each player must move one piece along a line from one circle to the next. Except ... instead of moving, the fox can jump as well!  
If a fox can jump over a goose it captures (eats) it and the piece is removed.

The fox wins when there are no geese left  
The geese win if the fox is trapped, unable to move.
